Carbonate Reservoir Characterization: A Geologic-Engineering Analysis, Part II (Developments in Petroleum Science) (Pt. II) From Elsevier Science

This second volume on carbonate reservoirs completes the two-volume treatise on this important topic for petroleum engineers and geologists. Together, the volumes form a complete, modern reference to the properties and production behaviour of carbonate petroleum reservoirs.

The book contains valuable glossaries to geologic and petroleum engineering terms providing exact definitions for writers and speakers. Lecturers will find a useful appendix devoted to questions and problems that can be used for teaching assignments as well as a guide for lecture development. In addition, there is a chapter devoted to core analysis of carbonate rocks which is ideal for laboratory instruction.

Managers and production engineers will find a review of the latest laboratory technology for carbonate formation evaluation in the chapter on core analysis. The modern classification of carbonate rocks is presented with petroleum production performance and overall characterization using seismic and well test analyses. Separate chapters are devoted to the important naturally fractured and chalk reservoirs.

Throughout the book, the emphasis is on formation evaluation and performance.

This two-volume work brings together the wide variety of approaches to the study of carbonate reservoirs and will therefore be of value to managers, engineers, geologists and lecturers.

Editorial Review

Review

This book is an important reference that will be of great use to both geologists and engineers.

Congratulations to the editors and Elsevier for bringing together such vast amounts of information within both parts of *Carbonate Reservoir Characterization: A Geologic-Engineering Analysis*. Part II should be on everyone's reference shelf.

AAPG Bulletin

Users Review

From reader reviews:

Susan Roundy:

As people who live in the actual modest era should be change about what going on or data even knowledge to make them keep up with the era that is certainly always change and move forward. Some of you maybe will update themselves by reading through books. It is a good choice for yourself but the problems coming to a person is you don't know what type you should start with. This Carbonate Reservoir Characterization: A Geologic-Engineering Analysis, Part II (Developments in Petroleum Science) (Pt. II) is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and want in this era.

Samuel Brooks:

Reading a publication tends to be new life style on this era globalization. With reading you can get a lot of information that will give you benefit in your life. Using book everyone in this world can certainly share their idea. Books can also inspire a lot of people. A lot of author can inspire their particular reader with their story or perhaps their experience. Not only the storyline that share in the publications. But also they write about the knowledge about something that you need example. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that you can get now. The authors on earth always try to improve their proficiency in writing, they also doing some research before they write with their book. One of them is this Carbonate Reservoir Characterization: A Geologic-Engineering Analysis, Part II (Developments in Petroleum Science) (Pt. II).

Arthur Coe:

Within this era which is the greater individual or who has ability in doing something more are more special than other. Do you want to become one among it? It is just simple method to have that. What you should do is just spending your time very little but quite enough to get a look at some books. On the list of books in the top listing in your reading list is usually Carbonate Reservoir Characterization: A Geologic-Engineering Analysis, Part II (Developments in Petroleum Science) (Pt. II). This book which is qualified as The Hungry Inclines can get you closer in becoming precious person. By looking way up and review this reserve you can get many advantages.

Rex Oswald:

Reading a book make you to get more knowledge from that. You can take knowledge and information from a book. Book is prepared or printed or created from each source in which filled update of news. In this modern era like now, many ways to get information are available for an individual. From media social such as newspaper, magazines, science reserve, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just looking for the Carbonate Reservoir Characterization: A Geologic-Engineering Analysis, Part II (Developments in Petroleum Science) (Pt. II) when you required it?
