Editorial Review

Review

This tutorial is designed to build upon an intermediate programmer's knowledge and explain how to design and develop a feature-rich, full operating system. "CD-ROM includes source code, a full 32-bit assembler, and a 32-bit C compiler. Explains the details of all 32-bit operating systems and allows users to actually develop their own customized system. Discusses OS initializations, programming interfaces, k". Covers IBM & Compatibles. -- *Sams Pub.*

About the Author

Richard A. Burgess is a retired U.S. Coast Guard commissioned officer. His first 10 years in the Coast Guard were in electronics technology and maintenance. His last 10 years of service were all computer-science related; he was the primary software design engineer for the Coast Guard's Commuinication Station Control System, and he headed the Coast Guard's Software Development Standards Team. He taught computer electronics technology at the Computer Learning Center of Washington, D.C., for two years, and he consulted in and around Washington under the guise of the D-Group. He is now the General Manager of Optipat, Inc. and Faxpat, Inc. in Alexandria, Virginia, high-technology, patent-trademark and copyright imaging firms. He would rather be on a beach somewhere in Florida and is working to that end.

Users Review

From reader reviews:

Tonya Hooper:

In this 21st one hundred year, people become competitive in most way. By being competitive at this point, people have do something to make all of them survives, being in the middle of often the crowded place and notice by means of surrounding.
