Vector Mechanics for Engineers: Dynamics By Ferdinand Beer, Jr., E. Russell Johnston, Phillip Cornwell

Continuing in the spirit of its successful previous editions, the tenth edition of Beer, Johnston, Mazurek, and Cornwell's *Vector Mechanics for Engineers* provides conceptually accurate and thorough coverage together with a significant refreshment of the exercise sets and online delivery of homework problems to your students. Nearly forty percent of the problems in the text are changed from the previous edition.

The Beer/Johnston textbooks introduced significant pedagogical innovations into engineering mechanics teaching. The consistent, accurate problem-solving methodology gives your students the best opportunity to learn statics and dynamics. At the same time, the careful presentation of content, unmatched levels of accuracy, and attention to detail have made these texts the standard for excellence.

Editorial Review

About the Author

Born in France and educated in France and Switzerland, Ferd held an M.S. degree from the Sorbonne and an Sc.D. degree in theoretical mechanics from the University of Geneva. He came to the United States after serving in the French army during the early part of World War II and had taught for four years at Williams College in the Williams-MIT joint arts and engineering program. Following his service at Williams College, Ferd joined the faculty of Lehigh University where he taught for thirty-seven years. He held several positions, including the University Distinguished Professors Chair and Chairman of the Mechanical Engineering and Mechanics Department, and in 1995 Ferd was awarded an honorary Doctor of Engineering degree by Lehigh University.

Phillip J. Cornwell. Phil holds a B.S. degree in mechanical engineering from Texas Tech University and M.A. and Ph.D. degrees in mechanical and aerospace engineering from Princeton University. He is currently a professor of mechanical engineering at Rose-Hulman Institute of Technology where he has taught since 1989. His present interests include structural dynamics, structural health monitoring, and undergraduate engineering education. Phil spends his summers working at Los Alamos National Laboratory where he is a mentor in the Los Alamos Dynamics Summer School and he does research in the area of structural health monitoring. Phil received an SAE Ralph R. Teetor Educational Award in 1992, the Dean's Outstanding Scholar Award at Rose-Hulman in 2000, and the Board of Trustees Outstanding Scholar Award at Rose-Hulman in 2001.

Born in Philadelphia, Russ holds a B.S. degree in civil engineering from the University of Delaware and an Sc.D. degree in the field of structural engineering from The Massachusetts Institute of Technology (MIT). He taught at Lehigh University and Worcester Polytechnic Institute (WPI) before joining the faculty of the University of Connecticut where he held the position of Chairman of the Civil Engineering Department and taught for twenty-six years. In 1991 Russ received the Outstanding Civil Engineer Award from the Connecticut Section of the American Society of Civil Engineers.

Users Review

From reader reviews:

Paul Kennedy:

The e-book with title Vector Mechanics for Engineers: Dynamics contains a lot of information that you can discover it. You can get a lot of advantage after read this book. That book exist new knowledge the information that exist in this book represented the condition of the world right now. That is important to you to learn how the improvement of the world. This specific book will bring you within new era of the

global growth. You can read the e-book on the smart phone, so you can read this anywhere you want.

Lisa Madruga:

People live in this new moment of lifestyle always attempt to and must have the spare time or they will get great deal of stress from both lifestyle and work. So , once we ask do people have time, we will say absolutely yes. People is human not really a robot. Then we question again, what kind of activity have you got when the spare time coming to you of course your answer will probably unlimited right. Then do you try this one, reading books. It can be your alternative within spending your spare time, the actual book you have read will be Vector Mechanics for Engineers: Dynamics.

Sandra Lynn:

This Vector Mechanics for Engineers: Dynamics is great e-book for you because the content which is full of information for you who always deal with world and get to make decision every minute. This kind of book reveal it information accurately using great manage word or we can point out no rambling sentences inside it. So if you are read it hurriedly you can have whole data in it. Doesn't mean it only provides you with straight forward sentences but tricky core information with lovely delivering sentences. Having Vector Mechanics for Engineers: Dynamics in your hand like finding the world in your arm, facts in it is not ridiculous one. We can say that no guide that offer you world with ten or fifteen small right but this publication already do that. So , this really is good reading book. Hello Mr. and Mrs. hectic do you still doubt in which?

Leroy Barker:

Beside that Vector Mechanics for Engineers: Dynamics in your phone, it may give you a way to get closer to the new knowledge or information. The information and the knowledge you can got here is fresh from oven so don't be worry if you feel like an previous people live in narrow commune. It is good thing to have Vector Mechanics for Engineers: Dynamics because this book offers for you readable information. Do you occasionally have book but you don't get what it's about. Oh come on, that won't happen if you have this inside your hand. The Enjoyable option here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss that? Find this book and also read it from today!
