Headache, Orofacial Pain and Bruxism: Diagnosis and multidisciplinary approaches to management(Content Advisors: **Stephen Friedmann BDSc (Dental); Cathy Sloan MBBS Dip RANZCOG (Medical), 1e** From Churchill Livingstone

Headache, Orofacial Pain and Bruxism: Diagnosis and multidisciplinary approaches to management has been written by clinicians for clinicians. It contains the collective knowledge of hundreds of years of clinical experience. The authors are drawn from a range of disciplines which regularly encounter patients with headache, orofacial pain or bruxism. They have described evidence-informed clinical practice derived from anatomical, physiological, and biomechanical concepts.

Patients who present with headache, orofacial pain or bruxism provide a clinical challenge to make sense of symptoms, sources, and contributing factors. There are many structures associated with problems in this region and patients may call on any of a number of health practitioners for diagnosis and treatment. It is often beyond the expertise of a single practitioner to address all facets of the problem without the assistance of colleagues.

- This book provides clinicians with the theoretical and clinical information required to appreciate the role of each discipline involved in the management of patients with headache, orofacial pain and bruxism.
- Clinicians are encouraged to use a multidisciplinary approach and to collaborate in the comprehensive management of these patients.
