### Editorial Review

Amazon.com Review

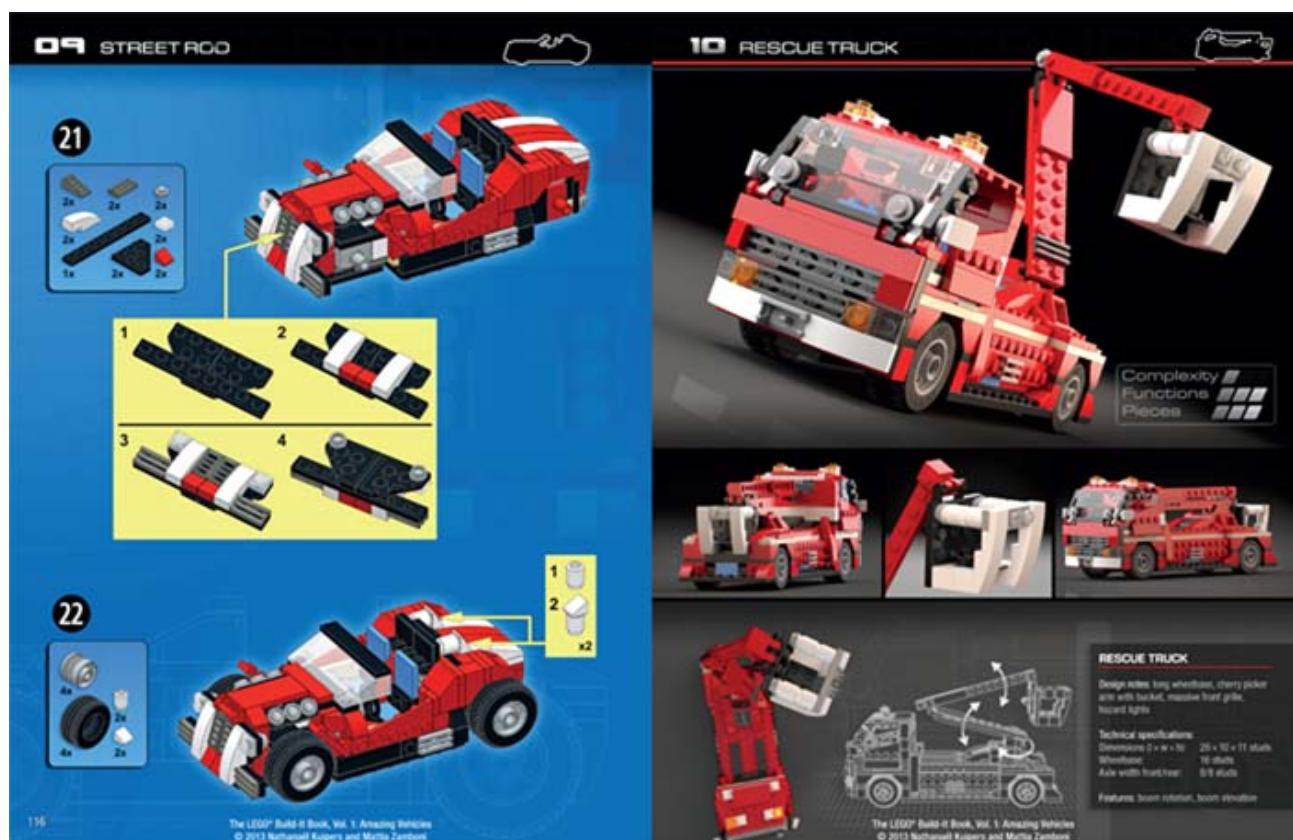

### A Message from the Authors

“Just imagine!”

Sometimes it's not as easy as it sounds, is it? Well, help is on the way. In this book, you'll find the secrets of a true master builder-- so be prepared for some pretty advanced techniques.

Because we don't want to bore you with theory, our focus is on building in practice, guiding you with step-by-step instructions. By creatively using the same pieces in 10 different configurations, you'll see the amazing potential of the LEGO brick.

We hope that this book helps you to discover the many possibilities that the LEGO system has to offer, unleashing your creativity and inspiring you to create your own original models!

### From the Author

Lately there has been an increasing demand for inspirational LEGO books. We have seen idea books including some building guides, books that explain the building system in theory, books that present some of the biggest and best creations over the world, but none that actually teach and show you how *you* can use *your bricks* to their maximum potential.

This book should cover that gap, in which we quickly introduce the reader on how they could use the building system, before putting things in practice, guiding them with step-by-step instructions. The other advantage is that we only use one palette of quite common bricks to build all the models, to further emphasize the potential of the brick in combination with our imagination.

#### About the Author

Nathanael Kuipers is a Dutch design professional who worked for several years as a product developer for the LEGO Group in Denmark, where he was mainly responsible for engineering LEGO Technic models. He is the mastermind behind some noteworthy Technic models including the 8272 Snowmobile, the 8292 Cherrypicker, and the impressive 8674 F1 Ferrari Racer. He has also collaborated on the creation of many other models. Check out his work at [nkubate.com/](http://nkubate.com/).

Mattia Zamboni is a fan of graphic design, photography, and LEGO, and he has a degree in electrical engineering. Based in Switzerland, he pursues his passion of graphic design, showcasing his talents within the world of 3D computer graphic arts. Check out his work at [brickpassion.com/](http://brickpassion.com/).

### Users Review
