Air-cooled Heat Exchangers And Cooling Towers: Thermal-flow Performance Evaluation And Design, Vol. 2 By Detlev Kroger

This new text represents the most detailed and comprehensive book presenting modern practice and theory relevant to the thermal-flow performance evaluation, design, and optimization of air-cooled heat exchangers and cooling towers. Kroger provides modern analytical and empirical tools used to evaluate the thermal-flow performance and design of air-cooled heat exchangers and cooling towers. He also covers how to prepare improved specifications and evaluate more critical bids with respect to thermal performance of new cooling systems. Further, Kroger explores improvement possibilities with respect to retrofits of existing cooling units as well as possible impacts of plant operations and environmental influences.

Air-cooled Heat Exchangers And Cooling Towers: Thermal-flow Performance Evaluation And Design, Vol. 2 By Detlev Kroger Bibliography

- Sales Rank: #2573629 in Books
- Brand: Brand: Pennwell Corp
- Published on: 2004-07-01
- Original language: English
- Number of items: 1
- Dimensions: 9.42" h x 1.15" w x 6.48" l, 1.73 pounds
- Binding: Hardcover
- 445 pages

Editorial Review

About the Author

Detlev G. Kroger is author and co-author of more than 150 published technical articles. He has presented many invited lectures and short courses on his research and development work in the field of air-cooled heat exchangers and cooling towers. Currently, he is a full-time professor at the University of Stellenbosch in South Africa. He is founding director of the Institute for Thermodynamics and Mechanics at the University of Stellenbosch and has acted as a consultant to companies involved in the power, petrochemical, and process industries throughout the world. He received his BS and B.Eng. from the University of Stellenbosch and his MS and PhD in Mechanical Engineering from the Massachusetts Institute of Technology. He is a fellow of the ASME and a recipient of numerous awards including the Thomas Price and Campbell-Pitt awards from the SAIME, the Chemical Processing Award from the SAICChE, the Dreosti Prize from SAIRAC, and the Havenga Prize from the SA Academy of Arts and Science. He received an honorary doctorate in Mechanical Engineering from the RAU.

Users Review

From reader reviews:

Terrance Bartholomew:

Do you have favorite book? When you have, what is your favorite's book? Publication is very important thing for us to be aware of everything in the world. Each guide has different aim as well as goal; it means that publication has different type. Some people experience enjoy to spend their time for you to read a book. They are reading whatever they get because their hobby is definitely reading a book. Think about the person who don't like examining a book? Sometime, man or woman feel need book after they found difficult problem or maybe exercise. Well, probably you will require this Air-cooled Heat Exchangers And Cooling Towers: Thermal-flower Performance Evaluation And Design, Vol. 2.

Roosevelt Alday:

What do you think of book? It is just for students since they're still students or it for all people in the world, the actual best subject for that? Only you can be answered for that query above. Every person has diverse personality and hobby for each other. Don't be compelled someone or something that they don't want do that. You must know how great along with important the book Air-cooled Heat Exchangers And Cooling Towers: Thermal-flower Performance Evaluation And Design, Vol. 2. All type of book is it possible to see on many resources. You can look for the internet sources or other social media.

Kim Nielsen:

Hey guys, do you really wants to finds a new book to read? May be the book with the headline Air-cooled Heat Exchangers And Cooling Towers: Thermal-flower Performance Evaluation And Design, Vol. 2 suitable to you? The particular book was written by famous writer in this era. Often the book untitled Air-cooled Heat

Exchangers And Cooling Towers: Thermal-flower Performance Evaluation And Design, Vol. 2 is a single of several books which everyone read now. This particular book was inspired lots of people in the world. When you read this guide you will enter the new dimension that you ever know before. The author explained their strategy in the simple way, so all of people can easily to understand the core of this guide. This book will give you a wide range of information about this world now. So you can see the represented of the world with this book.

Rex Vogler:

Reading a reserve tends to be new life style on this era globalization. With looking at you can get a lot of information that will give you benefit in your life. Having book everyone in this world may share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire their particular reader with their story or maybe their experience. Not only the storyline that share in the books. But also they write about the information about something that you need example of this. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that you can get now. The authors on this planet always try to improve their proficiency in writing, they also doing some study before they write for their book. One of them is this Air-cooled Heat Exchangers And Cooling Towers: Thermal-flower Performance Evaluation And Design, Vol. 2.
