Invasive Species: What Everyone Needs to Know® By Daniel Simberloff

Of the 7,000 estimated non-native species present in North America, approximately 1,000 are invasive. Clearly, invasive species are in the minority, but their small numbers don't keep them from causing billions of dollars in economic and ecological harm each year. Policymakers and ecologists continue to try to figure out which species might be harmful, which invasive species are doing the most damage, and which of these might respond best to eradication efforts. Invasive species reports and case studies are prevalent in political, environmental, and scientific news cycles, and a significant portion of the public is concerned about the issue.

In *Invasive Species: What Everyone Needs to Know®*, Simberloff will first cover basic topics such as how non-native species are introduced, which areas have incurred the most biological invasions, and how the rates of biological invasions have shifted in recent years. He then moves on to the direct and indirect impacts of the impacts of invasive species on various ecosystems, such as habitat and resource competition, how invasive species transmit pathogens, and how introduced plants and animals can modify a habitat to favor other non-native species. Simberloff's final chapters will discuss the evolution of invasive species, the policies we currently have in place to manage them, and future prospects for controlling their spread. The book will also contain a section dedicated to the more controversial topics surrounding invasive species: invasive natives, useful non-native species, animal rights versus species rights, and non-native species' impacts on the biodiversity of an ecosystem.

WHAT EVERYONE NEEDS TO KNOW About This Series

Who it's for:

Busy people with diverse interests, ranging from college students to professionals, who wish to inform themselves in a succinct yet authoritative manner about a particular topic.

What's inside:

An incisive approach to a complex and timely issue, laid out in a straight-forward, question-and-answer format.

Meet Our Authors

Top experts in their given fields, ranging from an *Economist* correspondent to a director at the Council on Foreign Relations, you can trust our authors' expertise and guidance.

Popular Topics in the "What Everyone Needs to Know" Series

- International Politics
- Environmental Policies
- World History
- Sciences & Math
- Religion & Spirituality

Review

"Written for nonexpert but educated readers, *Invasive Species* will reward those who demand well-documented information without requiring scientific details. By extending his wide-ranging survey of biological invasions beyond their biology, Simberloff acknowledges the crucial human dimensions of invasive species." -- *Science*

"Most interesting are discussions on the transport and spread of invasive species during ancient human migrations. Reflecting the author's unbiased writing, the book includes a chapter on the controversies surrounding the science and regulation of invasive species. Recommended." -B.R. Shmaefsky, Lone Star College - Kingwood, *CHOICE*

"Simberloff's narrative style clearly communicates the natural processes operating in invasion biology, along with the immense magnitude of invasion damages." -- *Biological Conservation*

"...probably the most comprehensive and easy-to-read mini-volume to tackle the enormous topic of biological invasions, and a useful springboard for further reading." -- Michael Stastny, University of Ottawa, *The Quarterly Review of Biology*

About the Author

Daniel Simberloff is Professor of Environmental Studies and Director of the Institute for Biological Invasions at the University of Tennessee, Knoxville. He is Editor-in-Chief of the journal Biological Invasions and senior editor of the Encyclopedia of Biological Invasions (University of California Press, 2011).

Users Review

From reader reviews:

Willie Wilson:

Have you spare time for the day? What do you do when you have more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their own spare time to take a move, shopping, or went to the Mall. How about open as well as read a book allowed *Invasive Species: What Everyone Needs to Know®*? Maybe it is to become best activity for you. You recognize beside you can spend your time along with your favorite's book, you can better than before. Do you agree with it has the opinion or you have various other opinion?

Caroline Hagemann:

Often the book Invasive Species: What Everyone Needs to Know® will bring one to the new experience of reading a book. The author style to explain the idea is very unique. Should you try to find new book you just read, this book very suitable to you. The book Invasive Species: What Everyone Needs to Know® is much recommended to you you just read. You can also get the e-book from official web site, so you can quicker to read the book.

Marlyn Melia:

Your reading 6th sense will not betray a person, why because this Invasive Species: What Everyone Needs to Know® publication written by well-known writer who knows well how to make book that could be understand by anyone who all read the book. Written inside good manner for you, dripping every ideas and producing skill only for eliminate your own hunger then you still hesitation Invasive Species: What Everyone Needs to Know® as good book but not only by the cover but also with the content. This is one reserve that can break don't determine book by its deal with, so do you still needing yet another sixth sense to pick this particular!? Oh come on your studying sixth sense already said so why you have to listening to a different sixth sense.

Colleen Edwards:

Reading a publication make you to get more knowledge from this. You can take knowledge and information originating from a book. Book is prepared or printed or outlined from each source which filled update of news. In this particular modern era like right now, many ways to get information are available for you. From media social including newspaper, magazines, science publication, encyclopedia, reference book, book and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just looking for the Invasive Species: What Everyone Needs to Know® when you needed it?
