**The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card)** By Jay M. Pasachoff, Alex Filippenko

Jay Pasachoff and Alex Filippenko combine extensive research experience, teaching experience, and textbook-writing experience to offer a book that is unparalleled in its ability to present the latest science in a way that students can understand. This brief, beautifully illustrated text - one of the briefest available for the course - offers concise coverage of a wide range of astronomical topics. The authors have struck a balance between the fundamental concepts and the exciting topics at the forefront of astronomy, conveying the spirit of contemporary astronomy within a big picture context. The authors emphasize the central theme of origins in this text, first by singling out specifics in the headings of each chapter and then by dealing with a variety of relevant material in the text itself. An early discussion of the scientific method stresses an importance on the verification of observations, and sets the stage for the text's consistent focus on astronomy as a science.

## **Editorial Review**

### **About the Author**

Jay M. Pasachoff is Field Memorial Professor of Astronomy at Williams College, where he teaches the astronomy survey course and works with undergraduate students. He is also Director of the Hopkins Observatory there. Pasachoff has observed 35 solar eclipses and is Chair of the Working Group on Solar Eclipses of the International Astronomical Union. He is part of a group of scientists observing the atmosphere of Pluto through stellar occultations. He also works in radio astronomy, concentrating on cosmic deuterium and its consequences for cosmology. Further, he collaborates with an art historian on images of comets, the Moon, and eclipses. Pasachoff is U.S. National Liaison to the Commission on Astronomical Education and Development of the International Astronomical Union and is also Vice-President of the Commission. He has twice been Chair of the Astronomy Division of the American Association for the Advancement of Science, and he has been on the astronomy education committees of the American Astronomical Society, the American Physical Society, and the American Association of Physics Teachers. He is on the Council of Advisors of the Astronomy Education Review, the on-line journal sponsored by the American Astronomical Society and the Astronomical Society of the Pacific. In addition to his college astronomy texts, Pasachoff has written the **PETERSON FIELD GUIDE TO THE STARS AND PLANETS**, and is author or co-author of textbooks in calculus and in physics as well as several junior-high-school textbooks. Pasachoff received his undergraduate and graduate degrees from Harvard and was at Caltech before going to Williams College. His sabbaticals and other leaves have been taken at the University of Hawaii's Institute for Astronomy, the Institut d'Astrophysique in Paris, the Institute for Advanced Study in Princeton, and the Harvard-Smithsonian Center for Astrophysics. Pasachoff has been awarded the 2003 Education Prize of the American Astronomical Society.

Alex Filippenko was recently awarded the 2006 Professor of the Year award by the Council for Advancement and Support of Education for his introductory astronomy course. He is a Professor of Astronomy at the University of California, Berkeley, having joined the faculty in 1986. He received his bachelor's degree in Physics from the University of California, Santa Barbara (1979), and his doctorate in Astronomy from the California Institute of Technology (1984). An observational astronomer who makes frequent use of the Hubble Space Telescope and the Keck 10-meter telescopes, Filippenko has also developed a completely robotic telescope that obtains data while he sleeps. He also made major contributions to the discovery that the expansion rate of the Universe is speeding up with time, driven by a mysterious form of dark energy--the top "Science Breakthrough of 1998," according to the editors of *Science* magazine. Filippenko's research accomplishments have been recognized with several major awards, including the Newton Lacy Pierce Prize of the American Astronomical Society (1992) and the Robert M. Petrie Prize of the Canadian Astronomical Society (1997). A Fellow of the California Academy of Sciences, he has also been a Guggenheim Foundation Fellow (2001) and a Phi Beta Kappa Visiting Scholar (2002). In 1991 he won the two most coveted teaching awards at Berkeley. He has played a prominent role in science newscasts and television documentaries such as "Mysteries of Deep Space," "Stephen Hawking's Universe," and "Runaway Universe."

## **Users Review**

### **From reader reviews:**

**Jodi Saldana:**

This The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) book is not really ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is usually information inside this e-book incredible fresh, you will get facts which is getting deeper you actually read a lot of information you will get. This specific The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) without we understand teach the one who reading through it become critical in thinking and analyzing. Don't become worry The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) can bring once you are and not make your carrier space or bookshelves' grow to be full because you can have it with your lovely laptop even phone. This The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) having great arrangement in word and layout, so you will not sense uninterested in reading.

**Clyde Welch:**

Beside this specific The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) in your phone, it may give you a way to get closer to the new knowledge or info. The information and the knowledge you will got here is fresh from your oven so don't be worry if you feel like an aged people live in narrow small town. It is good thing to have The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) because this book offers to you personally readable information. Do you sometimes have book but you don't get what it's exactly about. Oh come on, that won't happen if you have this in the hand. The Enjoyable blend here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss the idea? Find this book in addition to read it from at this point!

**Teresa Riggs:**

As a scholar exactly feel bored to reading. If their teacher asked them to go to the library as well as to make summary for some reserve, they are complained. Just small students that has reading's internal or real their leisure activity. They just do what the trainer want, like asked to the library. They go to right now there but nothing reading critically. Any students feel that examining is not important, boring and also can't see colorful pictures on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this The Cosmos: Astronomy in the New Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card) can make you truly feel more interested to read.

**Eddie McCoy:**

What is your hobby? Have you heard that question when you got students? We believe that that query was given by teacher to the students. Many kinds of hobby, Everybody has different hobby. And you know that little person just like reading or as reading become their hobby. You must know that reading is very important and also book as to be the matter. Book is important thing to include you knowledge, except your own teacher or lecturer. You find good news or update in relation to something by book. Amount types of books that can you go onto be your object. One of them is niagra The Cosmos: Astronomy in the New

Millennium (with AceAstronomy™, Virtual Astronomy Labs Printed Access Card).
