Climate Considerations in Building and Urban Design By Baruch Givoni, Bar Givoni

Climate Considerations in Building and Urban Design Baruch Givoni Climate Considerations in Building and Urban Design is the most comprehensive, up-to-date reference available on building and urban climatology. Written in clear, common-sense language by Baruch Givoni, the leading authority in the field, this book is a far-reaching look at a variety of climatic influences and their effects on individuals, buildings, and communities. Aimed at architecture and urban planning professionals and students alike, Climate Considerations in Building and Urban Design offers real-life solutions to climatological site planning and design issues, helping to settle disputes about site orientation, site organization, and the assembly of building materials. Climate Considerations in Building and Urban Design is organized into three parts. The first, Building Climatology, analyzes human thermal comfort and the effect of architectural and structural design features including layout, window orientation, and shading, and ventilation conditions on the indoor climate. Then, Urban Climatology explores the ways in which the climate in densely built areas can differ from surrounding regional climactic conditions, for example, in temperature, wind speed, and humidity. This part further explores the effects of urban design elements, such as urban density and building height, on a city's outdoor climate. Finally, Building and Urban Design Guidelines applies the body of available research on building climatology and the effects of physical planning on the urban and indoor climates to suggest design guidelines for different regions--for example, hot-dry and hot-humid climates. Filled with lists, tables, and graphs for easy cross-referencing, as well as hundreds of visuals, Climate Considerations in Building and Urban Design offers readers the ability to perform a quick check of a proposed scheme against authoritative criteria. Mr. Givoni's latest volume is a unique, indispensable guide to the relationship between building design, urban planning, and climate.

About the Author

About the Author Baruch Givoni is Professor Emeritus of Architecture in the Graduate School of Architecture and Urban Planning at UCLA, and was associated for many years with the Technion in Haifa, and with Ben Gurion University of the Negev in Beer Sheba, both in Israel. Mr. Givoni's classic text *Man, Climate, and Architecture* (1976) is considered the most authoritative volume in the field of building climatology. His career also includes teaching assignments at nearly a dozen universities, as well as hundreds of papers and contributions to scholarly works, lectures, and symposia. Mr. Givoni has assisted the World Health Organization, the World Meteorological Organization, the Israel Ministry of Housing, and numerous governments around the world on passive and solar energy design of structures in hot climates.

Users Review

From reader reviews:

Eileen Lopez:

Information is provisions for anyone to get better life, information currently can get by anyone at everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider when those information which is in the former life are difficult to be find than now could be taking seriously which one is suitable to believe or which one typically the resource are convinced. If you find the unstable resource then you buy it as your main information it will have huge disadvantage for you. All of those possibilities will not happen inside you if you take Climate Considerations in Building and Urban Design as your daily resource information.

Jason Nunez:

This Climate Considerations in Building and Urban Design is great book for you because the content that is certainly full of information for you who all always deal with world and have to make decision every minute. This specific book reveal it facts accurately using great plan word or we can say no rambling sentences included. So if you are read the idea hurriedly you can have whole facts in it. Doesn't mean it only provides straight forward sentences but tricky core information with lovely delivering sentences. Having Climate Considerations in Building and Urban Design in your hand like having the world in your arm, info in it is not ridiculous 1. We can say that no book that offer you world throughout ten or fifteen second right but this book already do that. So , this is good reading book. Heya Mr. and Mrs. busy do you still doubt that will?

Andrew Garcia:

You could spend your free time you just read this book this guide. This Climate Considerations in Building and Urban Design is simple to develop you can read it in the playground, in the beach, train and soon. If you did not have much space to bring the printed book, you can buy the particular e-book. It is make you easier to read it. You can save the actual book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.

Warren Bowers:

Reserve is one of source of know-how. We can add our information from it. Not only for students and also native or citizen want book to know the change information of year to year. As we know those ebooks have many advantages. Beside most of us add our knowledge, could also bring us to around the world. From the book Climate Considerations in Building and Urban Design we can acquire more advantage. Don't someone to be creative people? To become creative person must want to read a book. Merely choose the best book that appropriate with your aim. Don't become doubt to change your life at this time book Climate Considerations in Building and Urban Design. You can more inviting than now.
