### Crossmodal Space and Crossmodal Attention From Charles Spence

Many organisms possess multiple sensory systems, such as vision, hearing, touch, smell, and taste. The possession of such multiple ways of sensing the world offers many benefits. These benefits arise not only because each modality can sense different aspects of the environment, but also because different senses can respond jointly to the same external object or event, thus enriching the overall experience—for example, looking at an individual while listening to them speak. However, combining the information from different senses also poses many challenges for the nervous system. In recent years, there has been dramatic progress in understanding how information from different sensory modalities gets integrated in order to construct useful representations of external space; and in how such multimodal representations constrain spatial attention. Such progress has involved numerous different disciplines, including neurophysiology, experimental psychology, neurological work with brain-damaged patients, neuroimaging studies, and computational modelling. This volume brings together the leading researchers from all these approaches, to present the first integrative overview of this central topic in cognitive neuroscience.

### Editorial Review

#### Review

This book... is an excellent way to find out about recent developments in this area... I found this book fascinating, highly stimulating and enjoyable, and highly recommend it to anyone interested in perception and/or neuropsychology. \* Applied Cognitive Psychology \*

#### About the Author

Charles Spence is at Department of Experimental Psychology, University of Oxford, UK. Jon Driver is at Institute of Cognitive Sciences, University College London, UK.

### Users Review

#### From reader reviews:

##### **Paul Delatorre:**

Book is to be different for every grade. Book for children until finally adult are different content. As you may know that book is very important usually. The book Crossmodal Space and Crossmodal Attention had been making you to know about other expertise and of course you can take more information. It doesn't matter what advantages for you. The guide Crossmodal Space and Crossmodal Attention is not only giving you considerably more new information but also to be your friend when you experience bored. You can spend your spend time to read your e-book. Try to make relationship while using book Crossmodal Space and Crossmodal Attention. You never really feel lose out for everything in case you read some books.

##### **Monica Bonner:**

Spent a free time to be fun activity to try and do! A lot of people spent their leisure time with their family, or all their friends. Usually they doing activity like watching television, planning to beach, or picnic from the park. They actually doing same task every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? May be reading a book may be option to fill your free time/ holiday. The first thing you will ask may be what kinds of e-book that you should read. If you want to try out look for book, may be the book untitled Crossmodal Space and Crossmodal Attention can be great book to read. May be it can be best activity to you.

##### **Lori Whitten:**

You may spend your free time to study this book this reserve. This Crossmodal Space and Crossmodal Attention is simple to deliver you can read it in the area, in the beach, train in addition to soon. If you did not possess much space to bring the particular printed book, you can buy the actual e-book. It is make you quicker to read it. You can save often the book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

**Henry Heath:**

What is your hobby? Have you heard that question when you got scholars? We believe that that question was given by teacher on their students. Many kinds of hobby, Everybody has different hobby. And also you know that little person similar to reading or as looking at become their hobby. You need to know that reading is very important in addition to book as to be the matter. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You will find good news or update with regards to something by book. Different categories of books that can you choose to adopt be your object. One of them is Crossmodal Space and Crossmodal Attention.
