**Multilevel and Longitudinal Modeling Using Stata** By Sophia Rabe-Hesketh, Anders Skrondal

Presenting a thorough and accessible treatment of generalized linear mixed models, also known as multilevel or hierarchical models, **Multilevel and Longitudinal Modeling Using Stata** explains the models and their assumptions, applies methods to real data using Stata, and shows how to interpret the results.

Beginning with the comparatively simple random-intercept linear model without covariates, the text develops the mixed model from first principles, familiarizing the reader with terminology, summarizing and relating the widely used estimating strategies, and providing historical perspective. Once this mixed-model foundation has been established, the text smoothly transitions to random-intercept models with covariates and then to random-coefficient models. The middle chapters apply the concepts defined earlier for Gaussian models to models for binary responses (e.g., logit and probit), ordinal responses (e.g., ordered logit and ordered probit), and count responses (e.g., Poisson). Models with multiple levels of random variation are then considered, as well as models with crossed (nonnested) random effects.

The most complete and up-to-date depiction of Stata's capacity for fitting generalized linear mixed models, **Multilevel and Longitudinal Modeling Using Stata** serves as an ideal introduction for Stata users wishing to learn about this powerful data-analysis tool.

## **Editorial Review**

### **Review**

The description of all models is clear. ... There are ample plots and output tables to support each analysis, and very little mathematical content to interfere with the flow of exposition. There are exercises at the end of each chapter, and they, like the examples, span a wide range of application areas.

-Biometrics, September 2006

A strength of the book are the exercises at the end of each of the chapters. ... The authors are to be commended for helping foster the appropriate use of these flexible regression models.

-The American Statistician, Vol. 60, No. 3, August 2006

## **Users Review**

### **From reader reviews:**

#### **Margherita Pettit:**

Here thing why this specific Multilevel and Longitudinal Modeling Using Stata are different and dependable to be yours. First of all studying a book is good nevertheless it depends in the content than it which is the content is as tasty as food or not. Multilevel and Longitudinal Modeling Using Stata giving you information deeper since different ways, you can find any guide out there but there is no publication that similar with Multilevel and Longitudinal Modeling Using Stata. It gives you thrill looking at journey, its open up your eyes about the thing this happened in the world which is possibly can be happened around you. It is easy to bring everywhere like in park, café, or even in your technique home by train. Should you be having difficulties in bringing the paper book maybe the form of Multilevel and Longitudinal Modeling Using Stata in e-book can be your substitute.

#### **Brian Alexander:**

Reading can called imagination hangout, why? Because when you find yourself reading a book particularly book entitled Multilevel and Longitudinal Modeling Using Stata your thoughts will drift away trough every dimension, wandering in each and every aspect that maybe unknown for but surely can become your mind friends. Imaging just about every word written in a guide then become one form conclusion and explanation in which maybe you never get before. The Multilevel and Longitudinal Modeling Using Stata giving you yet another experience more than blown away your brain but also giving you useful data for your better life in this era. So now let us present to you the relaxing pattern at this point is your body and mind will probably be pleased when you are finished reading it, like winning a casino game. Do you want to try this extraordinary paying spare time activity?

#### **Scott Frew:**

Do you have something that you want such as book? The reserve lovers usually prefer to decide on book like

comic, small story and the biggest you are novel. Now, why not striving Multilevel and Longitudinal Modeling Using Stata that give your entertainment preference will be satisfied by means of reading this book. Reading behavior all over the world can be said as the way for people to know world better than how they react in the direction of the world. It can't be explained constantly that reading practice only for the geeky man or woman but for all of you who wants to end up being success person. So, for all you who want to start examining as your good habit, you may pick Multilevel and Longitudinal Modeling Using Stata become your own starter.

**David Byrd:**

What is your hobby? Have you heard in which question when you got pupils? We believe that that issue was given by teacher with their students. Many kinds of hobby, Every individual has different hobby. And you know that little person including reading or as reading through become their hobby. You need to know that reading is very important and book as to be the issue. Book is important thing to include you knowledge, except your current teacher or lecturer. You will find good news or update with regards to something by book. Numerous books that can you choose to adopt be your object. One of them is actually Multilevel and Longitudinal Modeling Using Stata.
