## **Puzzles in Logic, Languages and Computation: The Red Book (Recreational Linguistics)** From Springer

"A fantastic collection of problems for anyone who is curious about how human language works! These books take serious scientific questions and present them in a fun, accessible way. Readers exercise their logical thinking capabilities while learning about a wide range of human languages, linguistic phenomena, and computational models. " - Kevin Knight, University of Southern California Information Sciences Institute

This book brings together, for the first time in one collection, the best English-language problems created for students competing in the Computational Linguistics Olympiad. These problems are representative of the diverse areas presented in the competition and designed with three principles in mind: · To challenge the student analytically, without requiring any explicit knowledge or experience in linguistics or computer science; · To expose the student to the different kinds of reasoning required when encountering a new phenomenon in a language, both as a theoretical topic and as an applied problem. · To foster the natural curiosity students have about the workings of their own language, as well as to introduce them to the beauty and structure of other languages. Aside from being a fun intellectual challenge, the Olympiad mimics the skills used by researchers and scholars in the field of computational linguistics. In an increasingly global economy where businesses operate across borders and languages, having a strong pool of computational linguists is a competitive advantage, and an important component to both security and growth in the 21st century. This collection of problems is a wonderful general introduction to the field of linguistics through the analytic problem solving technique.

## **Editorial Review**

### Review

From the reviews:

“This book presents 56 problems, with solutions, created for high school students competing in a computational linguistics olympiad. ... The interesting, elegant, and very diverse problems are fun to read and solve, and may be enjoyed not only by high school students, but also by current, future, or potential system thinkers, including programmers, analysts, or linguists.” (H. I. Kilov, Computing Reviews, April, 2014)

### From the Back Cover

This is the first volume of a unique collection that brings together the best English-language problems created for students competing in the Computational Linguistics Olympiad. These problems are representative of the diverse areas presented in the competition and designed with three principles in mind:

- To challenge the student analytically, without requiring any explicit knowledge or experience in linguistics or computer science;
- To expose the student to the different kinds of reasoning required when encountering a new phenomenon in a language, both as a theoretical topic and as an applied problem;
- To foster the natural curiosity students have about the workings of their own language, as well as to introduce them to the beauty and structure of other languages;
- To learn about the models and techniques used by computers to understand human language.

Aside from being a fun intellectual challenge, the Olympiad mimics the skills used by researchers and scholars in the field of computational linguistics.

In an increasingly global economy where businesses operate across borders and languages, having a strong pool of computational linguists is a competitive advantage, and an important component to both security and growth in the 21st century.

This collection of problems is a wonderful general introduction to the field of linguistics through the analytic problem solving technique.

*"A fantastic collection of problems for anyone who is curious about how human language works! These books take serious scientific questions and present them in a fun, accessible way. Readers exercise their logical thinking capabilities while learning about a wide range of human languages, linguistic phenomena, and computational models."* - **Kevin Knight, USC Information Sciences Institute**

### About the Author

Dragomir Radev is the program chair of the North American Computational Linguistics Olympiad

(NACLO). He has been the head coach of the US teams at the International Linguistics Olympiad (IOL) since 2007. He holds a PhD from Columbia University and is currently a Professor of Computer Science and Engineering, Information, and Linguistics at the University of Michigan and an Adjunct Professor of Computer Science at Columbia University. He also serves as the secretary of the Association for Computational Linguistics (ACL) and is an Association for Computing Machinery (ACM) Distinguished Scientist.

## **Users Review**

### **From reader reviews:**

#### **Richard Endsley:**

Why don't make it to be your habit? Right now, try to prepare your time to do the important work, like looking for your favorite book and reading a reserve. Beside you can solve your long lasting problem; you can add your knowledge by the book entitled *Puzzles in Logic, Languages and Computation: The Red Book (Recreational Linguistics)*. Try to stumble through book *Puzzles in Logic, Languages and Computation: The Red Book (Recreational Linguistics)* as your good friend. It means that it can for being your friend when you truly feel alone and beside that course make you smarter than previously. Yeah, it is very fortunated for yourself. The book makes you far more confidence because you can know anything by the book. So , let us make new experience in addition to knowledge with this book.

#### **Clifford Jones:**

Book is written, printed, or descriptive for everything. You can realize everything you want by a publication. Book has a different type. As you may know that book is important point to bring us around the world. Next to that you can your reading skill was fluently. A publication *Puzzles in Logic, Languages and Computation: The Red Book (Recreational Linguistics)* will make you to possibly be smarter. You can feel considerably more confidence if you can know about anything. But some of you think that open or reading any book make you bored. It is not necessarily make you fun. Why they can be thought like that? Have you trying to find best book or appropriate book with you?

#### **Dianne Janelle:**

Information is provisions for anyone to get better life, information nowadays can get by anyone on everywhere. The information can be a knowledge or any news even an issue. What people must be consider when those information which is in the former life are challenging to be find than now is taking seriously which one is appropriate to believe or which one the particular resource are convinced. If you receive the unstable resource then you have it as your main information we will see huge disadvantage for you. All those possibilities will not happen with you if you take *Puzzles in Logic, Languages and Computation: The Red Book (Recreational Linguistics)* as the daily resource information.

#### **Tia Rosario:**

The book *Puzzles in Logic, Languages and Computation: The Red Book (Recreational Linguistics)* has a lot

details on it. So when you make sure to read this book you can get a lot of profit. The book was compiled by the very famous author. The author makes some research before write this book. This book very easy to read you will get the point easily after reading this book.
