Federal Taxation of Estates, Trusts and Gifts: Cases, Problems and Materials (Loose-leaf version) By Ira Mark Bloom, Kenneth F. Joyce

This discounted, three-hole punched, alternative loose-leaf version of the hardbound book is printed on 8 ½ x 11 inch paper with wider margins and with the same pagination as the hardbound book.

This edition again blends a traditional casebook approach with a problem method, to develop student understanding of the relevant rule structure pertinent to the transfer of wealth. The transactional organization facilitates student comprehension by repeatedly exposing students to certain themes, such as reason for deductibility, taxation based on passage of economic benefit, and valuation.

Federal Taxations of Estates, Trusts and Gifts begins with discussion of the development of the basic rules governing the transfer taxation of the simple estate, outright gifts, generation-skipping transfers, and the income taxation of trust and estates. The authors then explore more complex transactions, such as trusts with retained interests or powers, from the perspective of all four tax systems.
