Catastrophobia: The Truth Behind Earth Changes in the Coming Age of Light By Barbara Hand Clow

- Bestselling author Barbara Hand Clow examines legendary cataclysms and shows how we are about to overcome the collective fear they have instilled in us.
- The long-awaited follow-up that continues the revelations begun in *The Pleiadian Agenda*, which has sold more than 60,000 copies.
- Explains why, contrary to many prophets of doom, we are actually on the cusp of an era of incredible creative growth.

The recent discovery of the remains of ancient villages buried beneath the Black Sea is the latest instance of mounting evidence that many of the "mythic" catastrophes of history--the fall of Atlantis, the Biblical Flood--were actual events. In *Catastrophobia* Barbara Hand Clow shows that a series of cataclysmic disasters, caused by a massive disturbance in the Earth's crust 11,500 years ago, rocked the world and left humanity's collective psyche permanently scarred. We are a wounded species, and this unprocessed fear, passed from generation to generation, is responsible for our constant expectations of apocalypse, from Y2K to the famed end of the Mayan calendar in 2012.

Catastrophobia reveals the insidious global forces that have used these collective fears to control humanity for thousands of years. But we are in the midst of a tremendous shift in the Earth's 26,000-year precessional cycle, and there is every indication that the changes in consciousness over the last 30 years are the beginnings of a collective healing from these deep fears, heralding a new age where we will see that the era of cataclysms is ending and a time of extraordinary creative activity is at hand.
