### **The European Court of Justice and External Relations Law: Constitutional Challenges (Modern Studies in European Law)** From Hart Publishing

This volume appraises the role, self-perception, reasoning, and impact of the European Court of Justice on the development of EU external relations law. Against the background of the recent recasting of the EU treaties by the Treaty of Lisbon - and at a time when questions arise over the character of the Court's judicial reasoning and the effect of international legal obligations in its case law - the book examines the contribution of the Court to the formation of the EU as an international actor and the development of EU external relations law, and the constitutional challenges the Court faces in this context. To what extent does the position of the Court contribute to a specific conception of the EU? How does the EU's constitutional order, as interpreted by the Court, shape its external relations? The Court still has only limited jurisdiction over the EU's common foreign and security policy: why has this decision been taken, and what are its implications? And, what is the Court's own view of the relationship between court(s) and foreign policy, and of its own relationship with other international courts? The book's contributions show that the Court's influence over EU external relations derives, first, from its ability to shape and define the external competence of the EU and resulting constraints on the Member States, and, second, from its insistence on the autonomy of the EU legal order and its role as 'gatekeeper' to the entry and effect of international law into the EU system. It has not, in the external domain, overtly exerted influence through shaping substantive policy, as it has, for example, in relation to the internal market. Nevertheless, the rather 'legalized' nature of EU external relations and the significance of the EU's international legal commitments mean that the role of the European Court of Justice is more central than that of a national court with respect to the foreign policy of a nation state. And, of course, its decisions can nonetheless be highly political. (Series: Modern Studies in European Law)
