**Molecules and Medicine** By E. J. Corey, László Kürti, Barbara Czakó

*Molecules and Medicine* provides, for the first time ever, a completely integrated look at chemistry, biology, drug discovery, and medicine. It delves into the discovery, application, and mode of action of more than one hundred of the most significant molecules in use in modern medicine. Opening sections of the book provide a unique, clear, and concise introduction, which enables readers to understand chemical formulas.

## **Editorial Review**

### Review

"*Molecules and Medicine* is a fascinating introduction to the convergence of chemistry and physiology, and to the emergence of the science of molecular medicine." (*The Nucleus*, January 2010)

"*Molecules and Medicine* is extremely well organized and integrates history, chemistry, biology, and pharmacology of drug development seamlessly." (*The Quarterly Review of Biology*, September 2008)

"...I find this to be a useful book for someone teaching a biochemistry class. Use of examples and information from *Molecules and Medicine* should make material in lectures seem more relevant to students and assist motivation for learning." (*Biochemistry and Molecular Biology Education*, May/June 2008)

"This is a treasure trove of information about molecules as medicines." (*Education in Chemistry*, May 2008)

"*Molecules and Medicine* is an engaging book that takes the reader into the world of small molecule clinical therapeutics and how they are discovered and used to improve health." (*CHOICE*, March 2008)

"...numerous colorful illustrations that help to explain the various topics covered make it easy and interesting reading." (*ChemBioChem*, March 2008)

### From the Back Cover

#### **Molecules And Medicine**

This book is appropriate for a broad readership, starting with curious and thoughtful college undergraduates and reaching beyond to professors and researchers in the life sciences, chemistry, and medicine. This book provides, for the first time ever, a completely integrated look at chemistry, biology, drug discovery, and medicine.

*Molecules and Medicine* delves into the discovery, application, and mode of action of more than one hundred of the most significant molecules now in use in modern medicine. Molecule structures and shapes are shown for all of these medicines. The opening sections of the book provide a unique, clear, and concise introduction which enables the reader to understand chemical formulas.

### About the Author

**E. J. Corey** has been a Professor at Harvard University since 1959. He was educated at The Massachusetts Institute of Technology (1945-1950) and served as a faculty member at the University of Illinois from 1951 to 1959. He is the 1990 Nobel Laureate in Chemistry, and the recipient of over seventy international awards and honorary degrees, including the U.S. National Medal of Science, the Japan Prize in Science, and the Priestley Medal of the American Chemical Society. He is a member of the U.S. National Academy of Sciences and the U.S. National Institute of Medicine. Professor Corey is the author of more than 1,000 publications and is one of the most cited authors in science.

**Barbara Czakó** completed undergraduate studies at the University of Debrecen, Hungary, where she worked with Dr. Sándor Berényi. She obtained a Master of Science degree at the University of Missouri-

Columbia with Professor Shon R. Pulley. Dr. Czako received her Ph.D. degree (2006) in synthetic organic chemistry under the guidance of Professor Gary A. Molander at the University of Pennsylvania. Currently she is a postdoctoral fellow with Professor E.J. Corey at Harvard University. In 2005 she published with László Kürti the textbook *Strategic Applications of Named Reactions in Organic Synthesis*.

**László Kürti** was born and raised in Hungary. He received his diploma from the University of Debrecen, Hungary, where he conducted research in the laboratory of Professor Sándor Antus. Subsequently he received his Master of Science degree at the University of Missouri-Columbia working with Professor Michael Harmata, and his Ph.D. degree (2006) in synthetic organic chemistry under the supervision of Professor Amos B. Smith III (the University of Pennsylvania). Currently he is a Damon Runyon Cancer Fellow in the group of Professor E.J. Corey at Harvard University. In 2005 he published with Barbara Czako the textbook *Strategic Applications of Named Reactions in Organic Synthesis*.

## Users Review

### From reader reviews:

#### Marc Gaul:

What do you with regards to book? It is not important along? Or just adding material if you want something to explain what yours problem? How about your extra time? Or are you busy particular person? If you don't have spare time to do others business, it is gives you the sense of being bored faster. And you have free time? What did you do? All people has many questions above. They must answer that question simply because just their can do that. It said that about book. Book is familiar in each person. Yes, it is appropriate. Because start from on kindergarten until university need this specific Molecules and Medicine to read.

#### Christine Erhart:

Playing with family inside a park, coming to see the sea world or hanging out with close friends is thing that usually you have done when you have spare time, and then why you don't try issue that really opposite from that. A single activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Molecules and Medicine, you are able to enjoy both. It is excellent combination right, you still want to miss it? What kind of hangout type is it? Oh come on its mind hangout fellas. What? Still don't buy it, oh come on its named reading friends.

#### Pablo Cowart:

Your reading 6th sense will not betray a person, why because this Molecules and Medicine reserve written by well-known writer whose to say well how to make book which can be understand by anyone who else read the book. Written within good manner for you, dripping every ideas and creating skill only for eliminate your hunger then you still skepticism Molecules and Medicine as good book not merely by the cover but also from the content. This is one book that can break don't determine book by its deal with, so do you still needing one more sixth sense to pick that!? Oh come on your looking at sixth sense already told you so why you have to listening to one more sixth sense.

**Mary Christensen:**

Some people said that they feel bored when they reading a reserve. They are directly felt the idea when they get a half portions of the book. You can choose the book Molecules and Medicine to make your reading is interesting. Your own personal skill of reading ability is developing when you like reading. Try to choose straightforward book to make you enjoy you just read it and mingle the feeling about book and examining especially. It is to be initial opinion for you to like to start a book and go through it. Beside that the guide Molecules and Medicine can to be your friend when you're truly feel alone and confuse in what must you're doing of these time.
