Using the Schoolwide Enrichment Model with Technology By Angela Housand, Brian Housand, Joseph Renzulli Ed.D.

Using the Schoolwide Enrichment Model With Technology is an extension of a talent development model implemented in more than 2,500 schools across the U.S. and widely used internationally. More than 40 years of research and development has documented the effectiveness of the SEM approach to promoting higher level thinking skills and creative productivity. This solution-oriented book, unlike other books focused on using technology in the classroom, recognizes that digital technologies are changing and evolving at lightning speeds. Our effective skills for using technology transcend time by focusing on how to find and use digital resources and tools rather than listing the resources that already exist. Focusing on the skills that support critical thinking and problem solving, decision-making, and communication, the authors seamlessly merge technology to launch students toward independent productivity. This accessible and highly practical guide is rich with examples that will change the way you think about education while providing hands-on "how-to" guidance for creating a culture of excellence and innovation in your school and classroom.

Editorial Review

Review

The use of technology outlined here incorporates skills and processes, analysis, presentation, and critical and creative thinking in a way I have not seen in "how to teach with technology" books . . . [T]he content is absolutely solid. I would recommend this book for every teacher . . . --**Rebecca Bell, NSTA Recommends**
