What Everybody Ought To Know Before Moving A Data Center

By Blaine Berger

What Everybody Ought To Know Before Moving A Data Center By Blaine Berger

Who has the time to educate everyone on a complex project like a data center move?

This guide was written for those who are planning their first data center move. It strips the mystery around the process, informs executives about the challenges, and describes every data center move phase with prescriptions for success.

Written in plain language, it's the perfect tool for on boarding others at any phase of a data center relocation.

What's not in this guide?

You won't find full-blown work breakdown schedules (WBS), actual budgets, or any boilerplate project plans. The guide instead prepares you to understand the process and create your own work products. Application inventory and dependency mapping is a complex and highly technical subject making it impractical to cover in a beginner's guide to data center moving.

If you want to invest preparation time to understand the complexity of a data center move either as an executive or a practitioner, then this guide is your tool.

No matter what stage you find yourself or the degree of panic you feel, ground yourself in the fundamentals to effectively manage the urgency, people, and process required for a successful data center move.

Editorial Review

From the Author

Dear Reader - I wanted to write an introductory guide about data center moving that not only covered all the technical phases you would encounter but touched on a few of the non-technical details that trip up even the veteran practitioner.

This guide has been decades in the making. It started out as an onboarding handout for clients when I moved my first data center. Improving the information one data center move at a time until finally deciding to collect everything into a coherent guide for everyone.

I've made many of the mistakes I warn you about in this guide. I want these lessons learned to be your lessons remembered.

I welcome your feedback and ideas. Let me know if you need anything.
