## **International Relations in Perspective: A Reader** From Brand: CQ Press

International Relations in Perspective brings together a set of 43 classic and contemporary selections designed to introduce students to the most influential scholarship and key issues in the field. As balanced in its approach as Nau's introductory text, this distinctive reader gives equal space to realism, liberalism, constructivism and the work of critical theorists, more effectively reflecting the current state of scholarly debate. Organized to complement Perspectives on International Relations but flexible enough to use with any text or on its own, the collection covers a host of topics including terrorism, human security, development, civil society, global governance, political economy, and more. The book features substantive chapter introductions that situate the readings and help students understand how selections speak to one another.

## **Editorial Review**

### **Review**

This book does an excellent job of integrating the major theoretical approaches with practical applications. It serves as a great tool in teaching students about the different perspectives, without privileging one over the others. --- Jennifer Ramos, Loyola Marymount University

This reader provides the most thorough, wide ranging and up to date collection of readings in international relations currently available. Incorporating multiple perspectives including constructivism and feminist international relations, the book provides excerpts and articles which are accessible yet challenging. The materials are thematically arranged in an engaging format which is sure to stimulate great discussions in the classroom. I am particularly impressed with the materials discussing such current situations as global warming and opposition to globalization which students will surely find stimulating and relevant. - --Mary Manjikian, Regent University and former foreign service officer
