The City as a Terminal: The Urban Context of Logistics and Freight Transport (Transport and Mobility) By Markus Hesse

The on-time delivery of goods is regarded as a primary factor of the urban economy and is being monitored by businesses and government alike. However, much analysis of freight transportation and the flow of goods into, out of and within urban areas focuses on functional, business-related approaches. This book examines the interrelationship between logistics development on one hand and urban development and geographical issues, such as land use and location, on the other. Avoiding certain one-dimensional views on 'logistics impacts on the city', it discloses the complex interaction of the logistics system with the entire urban environment. It also bridges the gap between recent geographical research into new production systems and (post)modern consumption patterns. Illustrated with case studies from the United States, Germany, France, The Netherlands and the United Kingdom, it examines issues such as: the historical nexus between urban areas and logistics; current urban developments with regards to goods distribution; city-region related characteristics of freight flows; locational dynamics; and specific freight related urban problems and conflicts.

Editorial Review

Review

'...this book is a good attempt at a structured investigation into the complex interrelationships between urban form and freight transport and logistics activity, drawing on a broad range of areas both of academic study and public policy. The constantly evolving nature of these relationships is highlighted, with unclear causal relationships and often unexpected consequences, adding to the difficulties of identifying and influencing the ways in which future logistics and freight transport activities will materialise within the urban environment.'

Journal of Transport Geography

About the Author

Markus Hesse is Professor of Urban Studies at the University of Luxembourg, Faculty of Humanities, Geography and Spatial Planning research centre. His research is concerned with principles of urban and regional development, European urban development and policy, and the significance of global networks for cities.

Users Review

From reader reviews:

Anne Bonk:

As people who live in the modest era should be upgrade about what going on or facts even knowledge to make all of them keep up with the era which can be always change and move ahead. Some of you maybe will update themselves by looking at books. It is a good choice for yourself but the problems coming to a person is you don't know what one you should start with. This specific The City as a Terminal: The Urban Context of Logistics and Freight Transport (Transport and Mobility) can give you a lot of pals because by you taking a

look at this one book you have thing that they don't and make a person more like an interesting person. This particular book can be one of a step for you to get success. This reserve offer you information that might be your friend doesn't learn, by knowing more than some other make you to be great folks. So , why hesitate? Let us have The City as a Terminal: The Urban Context of Logistics and Freight Transport (Transport and Mobility).

John Merritt:

As a scholar exactly feel bored in order to reading. If their teacher expected them to go to the library as well as to make summary for some publication, they are complained. Just very little students that has reading's heart or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to there but nothing reading really. Any students feel that examining is not important, boring and also can't see colorful photos on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this The City as a Terminal: The Urban Context of Logistics and Freight Transport (Transport and Mobility) can make you feel more interested to read.
