How Google Tests Software By James A. Whittaker, Jason Arbon, Jeff Carollo

2012 Jolt Award finalist!

Pioneering the Future of Software Test

Do you need to get it right, too? Then, *learn* from Google. Legendary testing expert James Whittaker, until recently a Google testing leader, and two top Google experts reveal exactly how Google tests software, offering brand-new best practices you can use even if you're not quite Google's size...*yet!*

Breakthrough Techniques You Can Actually Use

Discover 100% practical, amazingly scalable techniques for analyzing risk and planning tests...thinking like real users...implementing exploratory, black box, white box, and acceptance testing...getting usable feedback...tracking issues...choosing and creating tools...testing "Docs & Mocks," interfaces, classes, modules, libraries, binaries, services, and infrastructure...reviewing code and refactoring...using test hooks, presubmit scripts, queues, continuous builds, and more. With these techniques, you can transform testing from a bottleneck into an *accelerator*—and make your whole organization more productive!

Editorial Review

About the Author

James Whittaker is an engineering director at Google and has been responsible for testing Chrome, maps, and Google web apps. He used to work for Microsoft and was a professor before that. James is one of the best-known names in testing the world over.

Jason Arbon is a test engineer at Google and has been responsible for testing Google Desktop, Chrome, and Chrome OS. He also served as development lead for an array of open-source test tools and personalization experiments. He worked at Microsoft prior to joining Google.

Jeff Carollo is a software engineer in test at Google and has been responsible for testing Google Voice, Toolbar, Chrome, and Chrome OS. He has consulted with dozens of internal Google development teams helping them improve initial code quality. He converted to a software engineer in 2010 and leads development of Google+ APIs. He also worked at Microsoft prior to joining Google."

Users Review

From reader reviews:

Christopher Pipkin:

What do you in relation to book? It is not important with you? Or just adding material when you really need something to explain what yours problem? How about your free time? Or are you busy individual? If you don't have spare time to complete others business, it is make one feel bored faster. And you have spare time? What did you do? Everybody has many questions above. They must answer that question simply because just their can do that will. It said that about reserve. Book is familiar on every person. Yes, it is appropriate. Because start from on guardería until university need this specific How Google Tests Software to read.

Karen Nash:

Here thing why this particular How Google Tests Software are different and reliable to be yours. First of all examining a book is good however it depends in the content than it which is the content is as delicious as food or not. How Google Tests Software giving you information deeper and different ways, you can find any e-book out there but there is no book that similar with How Google Tests Software. It gives you thrill examining journey, its open up your current eyes about the thing which happened in the world which is might be can be happened around you. It is possible to bring everywhere like in park your car, café, or even in your way home by train. When you are having difficulties in bringing the branded book maybe the form of How Google Tests Software in e-book can be your choice.

Suzanne Mitchell:

Nowadays reading books be than want or need but also get a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The knowledge you get based on what kind of publication you read, if you want have more knowledge just go with knowledge books but if you want really feel happy read one having theme for entertaining for example comic or novel. Often the How Google Tests Software is kind of guide which is giving the reader erratic experience.

Michele Fernandez:

Information is provisions for folks to get better life, information these days can get by anyone from everywhere. The information can be a know-how or any news even an issue. What people must be consider while those information which is from the former life are difficult to be find than now's taking seriously which one would work to believe or which one typically the resource are convinced. If you obtain the unstable resource then you buy it as your main information it will have huge disadvantage for you. All those possibilities will not happen throughout you if you take How Google Tests Software as your daily resource information.
