Predictive Data Mining Models (Computational Risk Management) By
David L. Olson, Desheng Wu

This book reviews forecasting data mining models, from basic tools for stable data through causal models, to more advanced models using trends and cycles. These models are demonstrated on the basis of business-related data, including stock indices, crude oil prices, and the price of gold. The book's main approach is above all descriptive, seeking to explain how the methods concretely work; as such, it includes selected citations, but does not go into deep scholarly reference. The data sets and software reviewed were selected for their widespread availability to all readers with internet access.

Editorial Review

From the Back Cover

This book reviews forecasting data mining models, from basic tools for stable data through causal models, to more advanced models using trends and cycles. These models are demonstrated on the basis of business-related data, including stock indices, crude oil prices, and the price of gold. The book's main approach is above all descriptive, seeking to explain how the methods concretely work; as such, it includes selected citations, but does not go into deep scholarly reference. The data sets and software reviewed were selected for their widespread availability to all readers with internet access.

About the Author

David L. Olson is the James & H.K. Stuart Chancellor's Distinguished Chair and Full Professor at the University of Nebraska. He has published research in over 150 refereed journal articles, primarily on the topic of multiple-objective decision-making, information technology, supply chain risk management, and data mining. He teaches in the management information systems, management science, and operations management areas. He has authored over 20 books and is a member of the Decision Sciences Institute, the Institute for Operations Research and Management Sciences, and the Multiple Criteria Decision Making Society. He was a Lowry Mays endowed Professor at Texas A&M University from 1999 to 2001. He was named the Raymond E. Miles Distinguished Scholar for 2002, and was a James C. and Rhonda Seacrest Fellow from 2005 to 2006. He was named Best Enterprise Information Systems Educator by the IFIP in 2006 and is a Fellow of the Decision Sciences Institute.

Desheng Dash Wu is a distinguished professor at the University of Chinese Academy of Sciences. His research interests include enterprise risk management, performance evaluation, and decision support systems. He has published more than 80 journal papers in such journals as Production and Operations Management, IEEE Transactions on Systems, Man, and Cybernetics: Systems, Risk Analysis, Decision Sciences, Decision Support Systems, European Journal of Operational Research, IEEE Transactions on Knowledge and Data Engineering, et al. He has coauthored 3 books with David L Olson, and has served as editor/guest editor for several journals such as IEEE Transactions on Systems, Man, and Cybernetics: Part B, Omega, Computers and OR, International Journal of Production Research.

Users Review

From reader reviews:

Evan Miller:

The reserve with title Predictive Data Mining Models (Computational Risk Management) includes a lot of information that you can understand it. You can get a lot of benefit after read this book. This kind of book exist new expertise the information that exist in this publication represented the condition of the world right now. That is important to yo7u to find out how the improvement of the world. This kind of book will bring you in new era of the globalization. You can read the e-book on your smart phone, so you can read the idea anywhere you want.

Patricia Ackermann:

Does one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Make an effort to pick one book that you never know the inside because don't judge book by its cover may doesn't work is difficult job because you are frightened that the inside maybe not since fantastic as in the outside look likes. Maybe you answer is usually Predictive Data Mining Models (Computational Risk Management) why because the excellent cover that make you consider in regards to the content will not disappoint an individual. The inside or content is actually fantastic as the outside or maybe cover. Your reading sixth sense will directly direct you to pick up this book.

Barbara McGowan:

The book untitled Predictive Data Mining Models (Computational Risk Management) contain a lot of information on that. The writer explains your ex idea with easy technique. The language is very clear and understandable all the people, so do not worry, you can easy to read that. The book was compiled by famous author. The author will bring you in the new age of literary works. It is easy to read this book because you can read more your smart phone, or program, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site as well as order it. Have a nice study.

Melissa Cox:

You can obtain this Predictive Data Mining Models (Computational Risk Management) by look at the bookstore or Mall. Merely viewing or reviewing it may to be your solve trouble if you get difficulties for your knowledge. Kinds of this book are various. Not only simply by written or printed and also can you enjoy this book simply by e-book. In the modern era such as now, you just looking from your mobile phone and searching what your problem. Right now, choose your ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose appropriate ways for you.
